SUMMARY

A software developer excitement inside is stillfresh, punctual, duly fulfilling his responsibility and wants to add value to people from myself. I can easily adapt to different technologies. The beginning of my front-end career took place in the last 1 month. I develop myself and try to increase my development speed gradually. Currently I'm learning Javascript and React.

EXPERIENCE

Kodluyoruz Front-End Challenge   04/2021 - 05/2021

- With the challenge project of We are coding, I stepped into the Front-End world. With our mentors, I developed myself especially in Javascript and React.

KTHack 2020 Quantum Technologies Hackathon   10/2020 - 10/2020

- I won first place in the Scientific Projects category in Hackathon, where I attended after the workshop I received.
- As 4 people who did not meet each other, we produced a project about QML in 24 hours. I gained a remote working experience with remote work with my teammates.

Team Leader   03/2020 - 12/2020

Hürtürk UAV Team

- I undertook the leadership of the Hürtürk team, which was preparing for the TÜBİTAK International UAV Competition.
- I gained a very good experience in project management and teamwork. I learned about crisis management due to pandemic conditions.

Machine Learning Internship   06/2019 - 07/2019

Kocaeli University

- I followed the Andrew NG Machine Learning course and learned methodology, data set preparation and model training.

EDUCATION

Computer Engineering   2021

Kocaeli University - Bachelor's Degree

SKILLS

React	BEM
JavaScript	HTML
Git	Teamwork
CSS/SCSS	Discipline
Bootstrap	Punctuality

LANGUAGES

Turkish	Native	English	Intermediate
